ConstructHub™ Releases Support for Windows® Internet Explorer 7.0 Company Makes Construction and Project Management Software as a Service Accessible to More Users

TEMPE, Arizona, 31-AUGUST-2007 05:00 AM ConstructHub, a leading provider of Construction and Project Management tools, releases product support for Internet Explorer version 7.0. The additional platform allows owners, municipalities, contractors, architects, engineers, sub contractors and suppliers greater on-demand access to mission-critical construction project data. ConstructHub additionally supports Mozilla Firefox deployment, Palm OS and Windows Mobile accessibility.

ConstructHub was conceptually designed and developed by experienced construction professionals. Frustrated by clunky, slow applications that did not intercommunicate, ConstructHub was founded to streamline construction business processes and delivers measurable efficiencies through improved visibility into the financial, human resources, and project management functions of construction management.

“ConstructHub has given us the ability to monitor all of our project status at any time, from anywhere. Today, we have accurate information at our fingertips, which is invaluable to running our business,” shares ConstructHub user and Palisade Construction Inc. President, Keith Wilson.

ConstructHub is a proven product that leads the market in ease-of-use, single point of entry, 24/7 access to current data, providing accurate real-time visibility into business operations for the numerous stakeholders in construction management.
