### **Southwest Architectural Builders Choose ConstructHub™ Online Project Management Solution Embraced by Field and Office Staff**

**TEMPE, Arizona, December 13, 2007 - 05:00 AM** [Southwest Architectural Builders, Inc.](#) (SAB) has selected ConstructHub, a sophisticated Web 2.0 Construction and Project Management solution, in support of SAB's core commitment to offering exceptional construction services in the greater Phoenix area.

Key to SAB's quality standards is providing timely, accurate, and relevant project data to all project stakeholders. ConstructHub enables true real-time collaboration - from the job site to the project management team to the owner, architect and engineer - with appropriate transparency and security. ConstructHub's software as a service model allows parties to access data from any Internet portal - office pc, dummy terminals, home and/or mobile devices.

"SAB was able to start using ConstructHub immediately to improve our internal processes," shares SAB Project Manager, Molly Kovaka. "Customizing forms and documents allowed SAB to personalize the product and make ConstructHub reflective of our own style of work and internal branding" continues Kovaka noting a key differentiator of ConstructHub. ConstructHub's ecosystem model and nimble technical architecture distinguishes it from other tools serving the construction industry. Second generation web applications, such as ConstructHub, are centered upon meeting a client's unique business needs and processes.

Founded by and for construction professionals, ConstructHub's mission is to deliver efficiency through simplicity. ConstructHub ends the construction industry legacy of client-heavy, product silos of monolithic applications requiring substantial investment and IT support. With no software to install, no platforms to integrate and customizable modules that communicate with your pre-existing tools, ConstructHub provides immediate ROI.

"Implementing ConstructHub integrates administrative, management and record-keeping functions with seamless communication of up-to-date data from the field to the office. Utilizing the billing module in concert with the subcontract module allows for fast and efficient project billing and cost verification, freeing up valuable time for project management tasks" says Kovaka. "Once we started using ConstructHub our team quickly became spoiled.....we wouldn't want to go without it," exclaims Kovaka.

Construction software is only of value when adopted by users in the field, in the office, and professional partners. "Our team is committed to ConstructHub. There has been really strong buy-in. ConstructHub is a great product" concurs SAB President and [Arizona Builders' Alliance](#) Director, Joe Hitzel.
